

Free online webinar of the ICOH Scientific Committee Aging & Work in collaboration with OMEGA-NET COST Action

Title "Understanding the transition from work to retirement – the concepts *retirement*, *healthy working life expectancy* and *health*."

Date: Monday, October 24th, 11.00 am - 12.30 pm, Central European Time

Short description: Retirement research is investigating the older workers' transition from working life into retirement. Many scientific disciplines are involved in this rapidly advancing research field, each contributing with own views, research questions, research approaches and not least concepts. The aim of the webinar is to shortly present and discuss three core concepts of relevance in retirement research:

1. *A conceptual framework addressing the complex labour market dynamics of the work-to-retirement process*
Presentation by Taina Leinonen, FIOH, Helsinki, see recent publication
<https://doi.org/10.1007/s10433-022-00704-3>
2. *Conceptualisation of healthy working life expectancy*
Presentation by Svetlana Solovieva, FIOH
3. *The role of health in the transition from work to retirement*
Presentation by Hans Martin Hasselhorn, Univ. Wuppertal, Germany, see also
